Association of Energy Engineers, SF Bay Area Chapter

Insulation, the Forgotten Investment for Energy-Efficiency

Ron King – Former President, *National Insulation Assoc.*

AGENDA:

6:00 – 7:00 Networking
7:00 – 7:15 Announcements
7:15 – 8:15 Presentation
8:15 – 8:30 QA / Wrap up

VENUE:

Pyramid Brewery & Alehouse
901 Gilman St.
Berkeley, CA 94710

COST:

Free!

Purchase your own food/drinks from the full food & drinks menu with cash/credit (no cheques)

REGISTER:

- Email: joseph@olscontrols.com
- Call: (408) 353-6564

Insulation is a proven & time tested, undervalued & under appreciated technology and energy conservation alternative, with internal rate of returns exceeding competing energy conservation initiatives. Insulation is rarely engineered, and 10-30% of all installed mechanical insulation is damaged or missing. This presentation provides evidence as to the "Power of Insulation" when designed, installed and maintained properly, including an overview of energy management software program and a demonstration of the most comprehensive evolving web-based resource developed for mechanical insulation in decades. There has never been a more important time to think about insulation.

Attendees will receive:

- A comprehensive Energy Management Software Program
- A list of available resources
- A subscription to the insulation industry premier publication, "Outlook"
